

Publishing Conditions and Rules of The 2nd International Conference on Recent Innovations in Engineering (ICRIES 2021)

The 2nd International Conference on Recent Innovations in Engineering (ICRIES 2021)
publishes articles/papers in different engineering sciences according to the following conditions

Type of Papers

Research papers and Review articles are accepted on the understanding that they have not been and will not be published elsewhere without the Editor-in-Chief's permission. Papers accepted become the copyright of the conference.

- a) Research papers - original full-length research papers that have not been published previously, and should have unlimited words from introduction to conclusion.
- b) Review articles - will be accepted in areas of topical interest, will normally focus on literature published over the previous five years, and should have unlimited words from introduction to conclusion .

Language

Manuscripts to be submitted should be ensured written in clear and comprehensible English. Authors whose native language is not English are strongly advised to have their manuscripts checked by an English-speaking colleague prior to submission. It is the author's responsibility to pay attention to grammar and spelling.

Preparation of Manuscript

Authors are recommended to follow the Guide to Contributors to prepare their manuscript accordingly. A single word processor containing title page information, manuscript, figure(s) and/or table(s) should be uploaded in a SINGLE file.

Scientific biography

A brief scientific biography of the researcher should be attached in separated file. It should include full name of the researcher and his institutional information.

Originality

The author must ensure that when a manuscript is submitted to The 2nd International Conference on Recent Innovations in Engineering (ICRIES 2021), the manuscript must be an original work. The Author should check the manuscript for any possible plagiarism using any program such as Turnitin or any other software before submitting the manuscripts to The 2nd International Conference on Recent Innovations in Engineering (ICRIS 2021).

All submitted manuscripts must be in the conference's acceptable similarity index range with zero% in results and the other paragraphs

PASS -<20%

REJECTED->20%

Authorship

All persons designated as authors should qualify for authorship. Each author should have participated sufficiently in the work to take public responsibility for the content. Authorship credit should be based only on substantial contributions to 1) conception and design, or analysis and interpretation of data; and to 2) drafting the article or revising it critically for important intellectual content; and on 3) final approval of the version to be published. Conditions 1, 2, and 3 must all be met. Participation solely in the acquisition of funding or the collection of data does not justify authorship. General supervision of the research group is not sufficient for authorship. Any part of an article critical to its main conclusions must be the responsibility of at least one author. Editors may ask authors to describe what each contributed; this information may be published. Increasingly, multicenter trials are attributed to a corporate author. All members of the group, who are named as authors, either in the authorship position below the title or in a footnote, should fully meet the above criteria.

All Papers Must Be Coincide The IOP Series Template Attached In This Site.
